# Vol. 62 No. 3183

## General Information

The *Trade-marks Journal* is published every week in compliance with Rule 15 of the *Trade-marks Regulations*. The Registrar of Trade-marks cannot guarantee the accuracy of this publication, nor assume any responsibility for errors or omissions or the consequence of these. All mail relating to trademarks should be addressed to the Registrar of Trade-marks, 50 Victoria Street, Gatineau, Quebec, Canada, K1A 0C9.

## Electronic *Trade-marks Journal*

The *Trade-marks Journal* is available in electronic form on the CIPO web site (http://cipo.gc.ca). The *Journal* is available in PDF format and can be downloaded free of charge, viewed and printed with Adobe Acrobat Reader. The electronic form of the *Trade-marks Journal* is the official version.

The *Journal* is also available in a printable HTML format as an alternate official version, and contains a search function to narrow and customize the *Journal* content to user defined areas of interest.

## Official Languages

The *Journal* is available in English and in French. The application details are displayed based on the language of the application. If the language of the application is English, the goods, services, or other text and description appearing in the English version of the Journal are in the language filed by the applicant. If the language of the application is French, the goods, services, or other text and description appearing in the English version of the Journal have been translated. Any registration resulting from the application will be restricted to these goods or services described therein.

## Filing Dates

The filing date of each trademark application advertised in the *Trade-marks Journal*, including those to extend the statement of goods or services of an existing registration, is shown next to the application number in the sequence of Year, Month and Day.

## Nice Classification

The *Journal* includes reference to the Nice classification when the goods or services of an application have been grouped and classed by the applicant in accordance with the current version and edition of the Nice Classification.

## Opposition

Any person who has a valid ground of opposition (see section 38 of the *Trade-marks Act* for the grounds of opposition) to any application for registration of a trademark or to any application for registration of a trademark extending the statement of goods or services advertised in this *Trade-marks Journal* may file a statement of opposition with the Registrar of Trade-marks within two months from the date of issue of this publication. The prescribed fee must accompany the statement of opposition.

## GOODS

Machine tools and machines for repairing and manufacturing parts for turbojets, ramjets, pulse-jets, rocket propulsion engines, machines for drape forming and coiling in the fields of aerospace, defense, and civil security; industrial robots; compressors, namely vehicle compressors, air compressors, gas compressors, refrigerator compressors; transmission and propulsion couplings and components, excluding those for land vehicles, for aircraft, namely apparatus for mechanic, electrical, and hydraulic transmission for power transmission, namely thermal engines, electrothermal engines, reactive engines, nuclear power engines, combined propulsion engines in the fields of aeronautics, aerospace, and defense, rocket propulsion engines, cryogenic rocket engines, rocket engines for launching satellites and for ballistic and tactical missiles; propulsion systems for aeronautical and space vehicles and their constituent parts, namely hydrazine thrusters for airplanes, bipropellant thrusters for airplanes, power-augmented catalytic thrusters, motors and engines, nacelles, thrust reversers; auxiliary power units for air and land vehicles; lubrication systems for airplane engines and other thrusters, namely machines, namely oil tanks, filters, valves , radial supply gerotor pumps; test stands for motors and engines and other thrusters, namely machines for aeronautical and space vehicles, namely for nacelles; mechanical braking devices, namely brakes, air brakes, thrust reversers for aircraft, all the aforesaid goods used in and intended for the fields of aerospace, defense, and civil security; scientific, radiographic, photographic, optical , weighing, measuring, control, inspection apparatus and instruments, namely radars, beacons, radar replies, satellites, altimeters, radiometers, encoders, namely laser for the marking and encoding of information in the fields of defense and civil security, of drawings, logos, barcodes, and messages on labels, planimeters and databases for flight simulators, camera batteries, digital cameras, camera memory cards, camera battery chargers, camera filters, seals for cameras cases, camera flashes, camera lenses, camera shutters, camera lens hoods, camera mounts, camera tripods, geodesic instruments, tachymeters, goniometers, graphometers, range poles, level rods, tachographs, theodolites and aircraft cockpit surveillance screens, and high- and very-high-resolution optical satellites, computer software and microcomputing software for demonstrations, education, and training in the field of digital imaging manipulation and interpretation, namely for satellite images, printed manuals, and study guides in the field of satellite data processing; apparatus for the recording, transmission, storage, reproduction of sound and images, namely videotape recorders, decoders for televisions and computers enabling the transmission, reproduction, and amplification of sound, images, and data; radio transmitters, namely transmitters and receivers for aerial surveillance in the fields of aerospace, defense, and civil security; DVD and CD players, computers, modems, speakers; electrical and electronic apparatus and instruments for measuring, operating, and controlling, namely calculators, sensors, namely analog calculators, digital calculators, optical calculators, hybrid calculators, sensors for time, solar sensors, speed sensors, pressure indicators, thermometers, vibration sensors; electric and electronic materials and equipment for maintenance and control to be installed on-board in airplanes and motors and engines, mounted to test stands, and portable for ground interventions, namely sensors and calculators to be installed on-board in airplanes and motors and engines, mounted to test stands, and portable for ground interventions enabling the reading and interpretation of data from calculators and sensors; electronic systems and equipment, on-board or otherwise, for data acquisition and processing, namely heat sensors, electrical controllers for signal beacons, converters for electronic data from magnetic tapes to CDs and DVDs, transformers and calculators for electronic data related to time control, pressure, temperature, and vibration in the fields of aviation and defense; electrical control systems for thrust reversers and control apparatus and instruments for thrust reversers, namely devices consisting of a calculator, an electronic power amplifier, as well as an electric engine for opening and closing the thrust reverser through electromechanical actuators; electric and electronic flight control apparatus, instruments, and devices for aerospace vehicles, namely electronic systems consisting of computer software and aircraft computers for communication, navigation, speed holding, turning holding, static pressure; flight control computer software for aerospace vehicles; energy distribution apparatus, instruments, and devices for aerospace vehicles, namely systems consisting of mechanisms and mechanical devices, computer software and computers for electrical distribution for aircraft motors and engines for concentrating the electrical energy produced by main generators mounted onto the engine accessory box, backup generators, mechanisms and mechanical devices for emergency generation, electrical harnesses, main batteries and ground units, that protect airplane systems, supply power to the grid, distribute power to airplane equipment, and are part of the airplane's complete electrical system, namely generation, conversion, distribution, and emergency generation system; electronic parameter processor cards, namely cards for reading intended to be added to computers for connection to a computer server for information in the fields of aviation and defense; protective sheaths for electrical wires, cables, harnesses, and connectors; apparatus and instruments for radiocommunication, telemetry, remote control, radio altimetry, proximetry, namely radio altimeters; data processing apparatus and equipment, namely computers; computer programs, and computer software for recording and processing data in the fields of aeronautics, defense, and civil security, namely computer software for optical character recognition, image processing software, computer software for the organization and visualization of images and photographs; computer programs and computer software for operating test stands for systems, equipment, and components of aeronautical and space vehicles, namely for nacelles, and other measuring apparatus, namely radio transmitters, radio tuners, radio frequency connectors, radio transceiver apparatus, telemeters, frequency-modulated telemetry transmitters, high-security remote controls with a ground transmitter and an on-board receiver, radio altimeters, radio frequency, radioelectric proximity detectors for measuring distance, proximetry radars; electronic, electromechanical, and optical equipment, namely sensors for operating test stands for systems, namely timing sensors, pressure sensors, temperature sensors; radar and antennas; apparatus and instruments for identification and recognition of people, fingerprints, palm prints, and other biometric features, namely physical access control terminals that use fingerprints and electronic card readers, biometric sensors, namely optical character readers, smart card readers, electronic card readers, and cameras used for the recording, encoding, and transcoding of biometric information for processing through biometric software and identification and authentication systems through biometry, consisting of software and computers for recognition, authentication, and identification of palm prints and retinal prints and physical features (veins, voice, face) of people; biometric verification and identification systems consisting of automatic identification and recognition devices, namely physical access control terminals that use finger and palm prints, databases, communications equipment, namely computers and computer software for processing biometric data, namely equipment and apparatus for access control, identification, authentication, namely physical access control terminals that use fingerprints and electronic card reads for the recognition, authentication, and identification of palm prints, retinal prints, and physical features ( veins, voice, face) of people; biometric system software for the identification and authentication of palm prints, retinal prints, and physical features (veins, voice, face) of people being used in and intended for the fields of aerospace, defense, and civil security; computer software for detecting people, namely computer software and for interpreting fingerprints, palm prints, and other biometric features, namely retinal prints; capacitive optical sensors for recognition, authentication, and identification of fingerprints, palm prints, retinal prints, and physical features (veins, voice, face) of people; card readers, namely smart card readers, electronic card readers, flash card readers, encoded magnetic card readers, memory card readers; biometry terminals, namely computers; electric locks and access control devices for buildings, services, equipment, and networks via verification of fingerprints, palm prints, and other biometric features, namely physical access control terminals that use fingerprints, palm prints, retinal prints, and electronic card readers; electronic chips; electronic card readers; optical sensors, namely retinal print sensors; devices for verification and identification of digital data, namely smart cards, smart card readers, USB tokens, unique physical and logical convergence cards/badges for businesses, with an interface enabling the transmission of data with or without contact, able to contain various applications, namely PKI ( Public Key Infrastructure), MoC (Match On Card), one-time password (OTP) generators, and electronic signature devices; apparatus, instruments, computer software, terminals, readers for the verification and identification of digital data, namely computers, portable computers, personal digital assistants, computer software for the verification and identification of the machine-readable zones in passports, visa documents, identification cards, driver's licenses, health cards, voter's cards, resident cards, residency permits, cards for healthcare professionals and other personal administrative documents, namely social security cards, including chips capable of transmitting data with and without contact; display terminals, computer terminals, and smart terminals and readers for the verification and identification of the machine-readable zones in passports, visa documents, identification cards, driver's licenses, health cards, voter's cards, resident cards, residency permits, cards for healthcare professionals and other personal administrative documents, namely social security cards, including chips capable of transmitting data with and without contact; devices, namely password identification equipment and software, namely smart card readers, bar code readers; apparatus, instruments, computer software and terminals, readers for data processing, namely computers, portable computers, personal digital assistants, word processing software, players for DVDs, audio and video compact discs, visual display units, namely computer monitors, video screens, printers, speakers; apparatus and instruments for data storage, namely magnetic sound recorders, videotape recorders; computer software for the verification, identification of secure digital data; apparatus and instruments for controlling personal identification data, namely identification cards containing a chip, smart card readers; antennas, namely radio antennas, cellular telephone antennas, television antennas, car antennas, parabolic antennas, satellite dish antennas; digital mapping apparatus, namely radars, beacon lights; gyroscope resetting apparatus using altitude correlation, namely aircraft navigation apparatus, namely inertial navigation systems, namely acceleration and rotation sensors used for determining the absolute movement of a vehicle, namely airplanes, missiles, submarines, ships, gyroscopes, GPS receivers; apparatus for the testing and maintenance of inertial equipment, namely sensors for position, speed, movement, acceleration, processing and analysis software for the fields of aeronautics, space, telecommunications, security, and defense, data processing and analysis software for assisting in the management of aircraft engine fleets and the operation of test stands; apparatus and devices for the transmission, remote control, signalling, and automatic monitoring of vehicles and parts for said apparatus and devices, namely on-board computers, transmitters and receivers, namely radio transceiver apparatus, radio frequency connectors, radio transmitters, radars, signal beacons, radio antennas, inertial and satellite navigation systems consisting of computer software and computers, calculators and inertial systems for airplanes, submarines, ships, land vehicles, automatic pilots for submarines; apparatus and equipment for fire control, namely viewfinders and laser target finders, cameras; optical apparatus and instruments for air reconnaissance, namely locator and spatial filtering lenses, infrared analyzers, helmet-mounted gunsights for pilots, missile approach detectors, cameras for airplanes and helicopters; apparatus and instruments for astronomy, namely refracting telescopes, spotting scopes and telescopes; telephony apparatus, equipment, and accessories for infrastructure in the field of cellular radio network applications in the military field, namely cellular telephones, cordless telephones, wireless telephony towers, accessories for cellular telephones, namely batteries, hands-free kits; electric and electronic apparatus, equipment, and instruments for navigation, guiding, piloting, stabilization for air, land, water, and space vehicles, namely navigation compasses; optical apparatus, equipment, and instruments for scientific applications, navigation, guiding, piloting, stabilization for air, land, water, and space vehicles, namely adaptive mirrors for lasers, adaptive mirrors for binoculars and telescopes, optical lasers, radars, beacon lights, radar replies, satellites; batteries, namely automotive batteries, camera batteries, cellular telephone batteries, all-purpose batteries; rechargeable batteries for vehicles; apparatus for recharging accumulators, namely chargers for electric accumulators for vehicles; fibre optic cables; video cameras, infrared cameras; headsets, telephone earphones, and speakers for military applications; inertial attitude systems and inertial heading systems, namely inertial strap-down systems, namely inertial flight navigation instruments consisting of accelerometers and gyroscopes; navigation compasses; infrared and ultraviolet optical components, namely adaptative mirrors for lasers, adaptative mirrors for binoculars and telescopes; computer monitors; equipment and apparatus for measuring trajectories, namely aircraft navigation apparatus, namely radars and beacon lights; equipment and apparatus for railway signalling, namely safety relays, transmitters of information between the railway and traction units, beacon lights, magnetic flux sensors, electromechanical sensing pedals, time delays, signal repetition boxes for locomotives; equipment and apparatus for naval signalling, namely radars, marking buoys, non-explosive fog and mist signals; accelerometric equipment and apparatus, namely accelerometers; equipment and apparatus for encryption and decryption, namely fingerprints, for the recognition of facial images, irises, namely encoders and decoders, namely optical scanners, print sensors, and audio sensors for the recognition, authentication, and identification of the palm prints retinal prints, and physical features (veins, voice, face) of people, computer software for encryption and decryption of data and information in the fields of aeronautics , space, communications, defense, and civil security; equipment and apparatus for optical and infrared detection outside of biometric applications, namely radars, sensors; equipment and apparatus for guiding, command guidance, automatic piloting, namely in the field of aviation, namely electronic aircraft systems consisting of devices equipped with sensors for communicating data related to navigation, speed holding, turning holding, static pressure; equipment and apparatus for radiolocation and satellite location for all kinds of vehicles, namely airplanes, submarines, ships, land vehicles, namely laser gyros, radars, satellites for global positioning systems (GPS); equipment and apparatus for navigation and positioning for vehicles, namely on-board computers, receivers for global positioning systems (GPS), transmitters for global positioning systems (GPS); equipment and apparatus for preparing missions for land, air, and sea vehicles enabling the visualization of itineraries, namely electric and electronic apparatus for capturing, recording, delivering, and analyzing data, images, and information, namely transmitters and receivers for aerial surveillance, namely radars in the fields of aerospace, defense, and civil security; locating devices, trackers, localizers, homing devices, namely motion detectors and high-precision radars for airborne and land surveillance; observation and recognition systems, namely airborne systems for land recognition and surveillance based on radar imagery consisting of thermal images, optronic balls, viewfinders, thermal cameras, laser sensors; range finders; equipment and apparatus for propulsion engine simulation, namely test stands for aircraft; gyroscopic equipment and apparatus, namely gyroscopes; on-board digital equipment and apparatus for navigation and attack for airplanes, namely sensors, regulators, converters, transformers, calculators, for localization and spatial filtering, infrared analyzers, helmet-mounted gunsights for pilots, missile approach detectors, cameras for airplanes; equipment and apparatus for the transmission of messages, information, data, sound, and images over-the-air, via cable, fibre optics, telephone, satellite, terminals, telecommunications networks, computer networks, namely computers, telephones, cellular telephones, satellite telephones, visual display units, namely computer monitors, video screens; optical equipment, apparatus, and instruments for deck landing for aircraft carriers, for assisting in the deck landing and landing of airplanes, namely optical ray guidance devices, namely visual aids for helicopters' approaching and deck landing, namely devices for designating objectives via laser, namely beacon lights, magnetic compasses; gyrometers; thermal imagers; binoculars for day/night vision; solid laser and gas laser other than for medical use used in fields of military, aeronautics, navy, defense, and civil security, namely beacon lights for signalling; laser diodes other than for medical use; optical lenses, namely camera lenses, magnifying lenses; logs; odometers, apparatus for measuring speed, namely, doppler radars; periscopes; telescope sights, telescopes, spotting scopes; apparatus for voice recognition and biometric devices for digital and facial recognition, namely optical sensors and physical access control terminals enabling the recognition and authentication of voice, fingerprints, and faces; electric servomechanisms and their components, namely airplane engines, airplane servomotors, electric generators, synchro-transmitters, resolvers, potentiometers, speed reducers, synchronizers ; secured telephones and faxes; wireless cellular phones for application in the fields of military, aeronautics, and navy, excluding all other fields; gyro-stabilized sights; holographic sights; telemetry equipment and apparatus, namely radio altimetry, radio frequency, solar generators for satellites; apparatus and equipment for road safety, namely apparatus and equipment for speed control, crossing of red lights, reading of registration number plates and treatment of violations, namely radars, all the aforesaid goods being used in and intended for the fields of aerospace, defense, and civil security; apparatus for locomotion by air, aeronautical and astronautical vehicles, namely aircraft, airplanes, unmanned aircraft, drones, helicopters, space launchers, rockets for space use; spare parts and components for motors and engines and for thrusters for aerospace vehicles, namely nacelles, transmission and propulsion couplings and components, namely engine air inlets, fan cases, exhaust cones, thrust reversers; spare parts and components for aerospace vehicle cockpits; brakes and braking systems for air vehicles; suspensions, shock absorbers for suspensions for airplane landing gears; landing gears and landing gear retraction devices, landing gear systems and controls for aerospace vehicles; thrust reversers, thrust reverser systems and controls for aerospace vehicles; instrument panels, namely dashboards for aircraft; steering yokes with integrated levers, except tires, wheels, and their constituent parts; passports, visa documents, identification cards, driver's licenses, health cards, voter's cards, resident cards, residency permits, cards for healthcare professionals and other personal administrative documents, namely health insurance cards, social security cards containing machine-readable zones, all these documents made of paper and cardboard, namely social security cards, containing chips capable of transmitting data with and without contact, all the aforesaid goods being used in and intended for the fields of defense and civil security.

## Certification Mark Text

The use of the certification mark is intended to indicate that the manufacturing and the services provided by a specific organization, when performed or advertised in association with the mark, comply with the Standard BNQ21000 of the Bureau de Normalisation du Québec. BNQ 21000, which may change from time to time, is a Canadian standard that gives requirements for an organizations' effort to reduce polluting in its manufacturing and consuming process for the purpose of manufacturing or operating its business. The objective of BNQ 21000 is to provide a set of requirements that, if they are effectively implemented, will provide a client with confidence the goods and services are manufactured or provided as to reduce pollution on the planet and comply with the BNQ 21000 Standard. The requirements cover a wide range of topics, including the supplier's top management commitment to reduce pollution, adequacy of its resources, employee competence, process management (for production, service delivery and relevant administrative and support processes), quality planning, product design, review of pollution effect in its purchasing, monitoring and manufacturing of products or providing services, choice of equipment, processes to reduce pollution, corrective/preventative actions, a requirement to drive continual improvement of the pollution reduction. More specifically, the use of the certification mark is intended to indicate that the manufacturing process of the goods and services and/or the operations of the certified organization comply with the following defined standard: (i) the mission, the vision and the value of the organization take into consideration the issues related to sustainable development classified pursuant to 4 themes: environmental, economic, social and transversal; (ii) the strategy of the organization is established following short term and medium term objectives and communicated to all stakeholders; (iii) the organization has adopted a code of conduct and/or code of ethics and its employees are familiar with their content; (iv) the organization has set up a process to ensure the satisfaction of its clientele with respect to its products and services; (v) the corporate chart of the organization is well known and the decision-making body of the organization is well organized and diligent; (vi) the profitability of the organization is controlled and is subject to regular monitoring and analysis; (vii) the organization has adopted a plan to ensure its sustainability; (viii) the organization has adopted an investment policy; (ix) the organization has made an analysis related to its commercial practices, as well as the commercial practice of its suppliers and subcontractors; (x) the organization has assessed the impact of its activities on local development and has adopted related programs; (xi) the organization has made an analysis related to work conditions and employer-employee relations; (xii) the organization provides the tools and trainings to its employees for the development of their abilities; (xiii) the organization has adopted programs to facilitate the communications between employees and employers and to encourage the employees to participate in the activities and decisions of the organization (xiv) the organization respects the laws related to pay equity; (xv) the organization offers trainings and takes actions to ensure a safe working place to its employees; (xvi) the organization has made an analysis related to its use of raw materials and to waste management; (xvii) the organization has made an analysis related to the management of drinking water and waste water; (xviii) the organization has made an analysis related to its consumption of energy; (xix) the organization has made an analysis related to its emission of greenhouse gas; (xx) the organization has made an analysis related to its management of other types of pollution; and (xxi) the organization has analyzed and has adopted and set up policy and programs related to its general impact on the environment and taken actions to reduce its ecological footprint. The certification provides 4 different levels, which will be granted depending on how the organization scores in relation with the criteria mentioned hereinabove, namely " Engagement" if the organization meets at least 8 of the 21 criteria, "Performance" if the organization meets at least 12 of the 21 criteria, "Optimum" if the organization meets at least 14 of the 21 criteria, and "Elite" if the organization meets at least 16 of the 21 criteria.
